Education is always evolving and most recently has shifted to increased online or remote learning. Digital learning and teaching in chemistry compiles the established and emerging trends in this field specifically within the context of learning and teaching in chemistry. The authors are chemistry instructors and researchers from nine countries contributing an international perspective on digital learning and teaching in chemistry. While the chapters in this book span a wide variety of topics as a whole they focus on using technology and digital platforms as a method for supporting inclusive and meaningful learning.
